Restaurant ERP Module

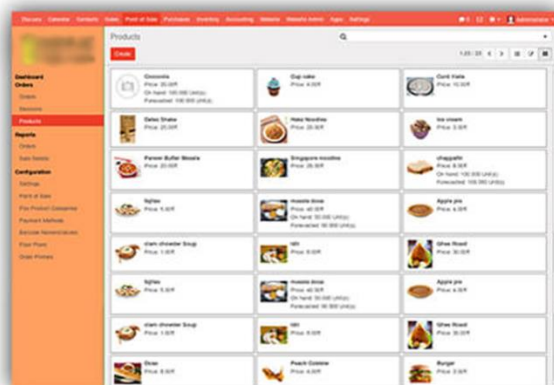

An ERP for your restaurant needs

A God-eye's view on your restaurant

Restaurant ERP lets you quickly overview your restaurant and jump from floor to floor to your table's orders. The Layout can be changed on a whim, tables can be added and removed as you wish.

The Floor plan will tell you exactly where are your customers, where are the free tables, who is still waiting for food, and how much room do you have left.

The system supports multiple point of sales in the same restaurant. The floor plan is entirely optional and can be configured on a point of sale basis.

Unified data to improve your sales

Unified data across all restaurants to improve your sales.

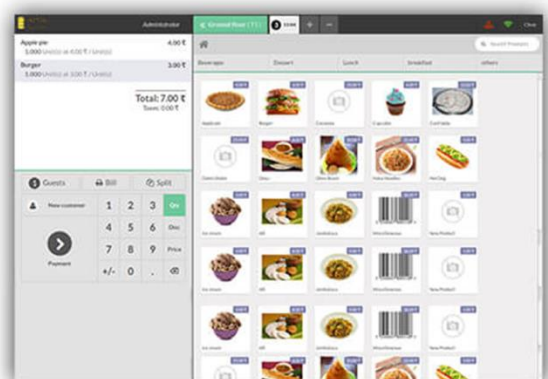

Restaurant ERP implement various functionalities to improve your sales. New products, pricing strategies and promotions can be automatically applied to the restaurants. You can implement a global strategy across all your restaurants without difficulties. With Restaurant ERP as a backend, you have a system proven to be perfectly suitable for all sizes - from small bars to restaurant chains.

User-friendly Point of Sale

Set-up in minutes, sell in seconds

ERP's Point of Sale app is based on a simple, user friendly interface that everyone can use without difficulty. The POS can be used online or offline and iPads, Android tablets or laptops.

Restaurant POS is fully integrated with its Inventory and Accounting. Any transaction with your POS will automatically go to your inventory management and accounting and, even to your CRM as the customer can be identified from the app.
